SUMMARY

Computer Engineering graduate with a motivation to learn all about technological advancements and a constant motivation to learn new things. I combine solid technical fundamentals with well-developed communication, teamwork, and problem-solving skills to deliver value and adapt quickly in dynamic environments

EDUCATION

Diponegoro University | Computer Engineering
Semarang, Indonesia • **GPA 3.77 / 4.00**

2022 - 2026

Final-Year Project — ICE Logger (Internal Combustion Engine Data Logger)

- Designed and built a multisensor data-acquisition system monitoring real-time engine performance across RPM, torque, fuel consumption, temperature, and airflow.
- Developed a custom 2-layer PCB with modular RJ45 sensor connectors and signal-conditioning circuitry, integrating five sensor types via ADC modules and an ATmega328P microcontroller.
- Performed sensor calibration and functional testing, then implemented real-time output via LCD and UART serial communication to a PC for logging and analysis.

TECHNICAL SKILLS

Programming	TypeScript, JavaScript, Java, SQL, PHP, C/C++ (embedded), VBA
Frameworks	Next.js, React, React Native, Tailwind CSS, Laravel
Backend & Data	Supabase, PostgreSQL, Row-Level Security, REST APIs, authentication & session management
Security	MFA / TOTP, secure coding, SAST & DAST with SonarQube, input validation, SQL injection & XSS prevention
Tools	Git & GitHub, Vercel, Figma, phpMyAdmin, Microsoft Excel (VBA)
Hardware & Network	ATmega328P, ADC sensor integration, PCB design, UART, IP addressing, routing & switching
Languages	Bahasa Indonesia (native) • English (Intermediate working proficiency)

PROFESSIONAL EXPERIENCE

IT Intern — Information System & Technology Division | PT Toyota Motor Manufacturing Indonesia *Feb 2026 - Aug 2026*
Infra-Security Standardization Department

- Supported the company-wide MFA Integration Project across Email OTP, WhatsApp OTP, Authenticator App (TOTP), and Device Passkey — preparing integration documentation, rollout schedules, and stakeholder presentations.
- Authored the full MFA test documentation set (IFT, BCT, UT) covering OTP timeout, failed-attempt limit, and grace-period scenarios, plus the Bahasa Indonesia end-user login manual for all four authentication paths.
- Developed Secure Coding Awareness training materials for the ISTD team on input validation, SQL injection and XSS prevention, SAST/DAST with SonarQube, and the vulnerability remediation flow.
- Automated administrative document handling with Excel VBA macros for formatting, print layout, and batch file processing, eliminating hours of repetitive manual work each week.
- Produced user-facing SOPs for LAN and Wi-Fi connectivity troubleshooting, and researched open-source tooling for internal adoption across credential management, uptime monitoring, and internal documentation.

SELECTED PROJECTS

SITOMAS Kresno — Point-of-Sale & Inventory System | Next.js, TypeScript, Supabase *2026*

- Built and deployed a production system now in daily commercial use at a gold jewelry retailer, unifying sales, purchasing, stock, pawning, repair services, and receivables into a single workflow with barcode scanning and printable invoices.
- Engineered weight-based gold pricing per karat, buyback valuation, and monthly pawn interest with auto-generated installment schedules, plus consolidated financial reporting — secured with Supabase Auth, Row-Level Security, a server-verified PIN gate, and idle auto-logout.

Bearion — Full-Stack E-Commerce Platform | Next.js, TypeScript, Supabase, PayPal, Biteship *2026*

- Developed a bilingual storefront for a clothing brand with a complete order lifecycle including cancellation and shipment tracking, plus an admin dashboard for products, pricing, and promotions.
- Integrated PayPal with server-side capture verification, manual bank transfer with admin-verified proofs, multi-courier shipping rates and tracking, and live IDR/USD conversion — secured with role-based access control and PostgreSQL Row-Level Security.

November Coffee — Cafe Management System | Next.js, TypeScript, Supabase, OCR.space, Vercel, Cron-job *2025*

- Built multi-shift employee attendance tracking, automated payroll calculation with salary-slip generation, and real-time inventory management, running scheduled operations through automated cron jobs on Vercel.

- Implemented OCR-powered receipt processing that extracts data from photographs automatically, alongside role-based authentication and a three-shift system with WIB timezone handling.
- Pekalongan Government Website Redesign** | Laravel, PHP, Tailwind CSS, MySQL 2024
- Led the UI redesign of a public-sector website into a modern, responsive platform built to accessibility standards, implementing the frontend in HTML and Tailwind CSS.
 - Integrated backend operations with the Laravel PHP framework and managed the database through phpMyAdmin, coordinating team contributions via GitHub version control.

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

- Speaker, SPACE Program** | Computer Engineering Student Association Jan 2024 - Jan 2025
- Designed and delivered seminars introducing the Bakti BCA Scholarship to prospective applicants, breaking a complex application process into clear, actionable stages.
 - Coached participants on interview technique, document preparation, and communication skills.

- Head of Human Resource Development Division** | Keluarga Mahasiswa Buddhis Dharmavamsa Dec 2024 - Dec 2025
- Led the HRD division, designing end-to-end program workflows from initial concept through execution and post-event evaluation.
 - Established routine meetings as a structured two-way feedback channel between members and leadership.

- Head of Social Division** | Computer Engineering Student Association Mar 2024 - Mar 2025
- Planned and ran the division's social and community service programs, coordinating monthly progress reviews.
 - Represented the association in external forums and inter-faculty community service activities.

Additional involvement: Member, Google Developer Student Club (2023 - 2024) • Member, Software Division, Computer Engineering Research Club (2023 - 2024) • Internal Coordinator, Consumption Division, LKMM-D (2024)

CERTIFICATIONS & AWARDS

- **Bakti BCA Scholarship Awardee** — PT Bank Central Asia Tbk, 2024 - 2025. Completed mentoring, workshops, and seminars; developed a Business Impact Plan for local MSMEs.
- **Digital Talent: Java Fundamentals & Programming** — Pusbang Profesi dan Sertifikasi, 2024
- **Java Programming (2024) and Java Fundamentals (2023)** — Oracle Academy
- **IT Essentials: PC Hardware and Software** — Cisco Networking Academy, 2023
